

Parents

Young people today are living in a rapidly changing world and so preparing our students for the challenges and opportunities out there is a vital aspect of their education. Forest Park School is committed to developing and arming each individual student with the most up to date research and knowledge as they progress through the different key stages.

A key element to aiding a student's development is instilling the valuable ideals of responsibility and independence to forge their own paths forward. Working in partnership with parents, the Careers Department guides and supports students in an enthusiastic and professional relationship throughout their time at Forest Park School.

How can you help?

- Attend EHCP reviews to discuss next steps for your child.
- Attend open evenings/ open days at relevant further education or day service placements.
- Visit the local community to encourage your child to experience different work places and active roles within it.
- Practise skills that encourage independent living and community participation (please see our student career posters for ideas) within the home and when out visiting different places.
- Give us feedback! We are always looking to develop and evolve our careers education provision so please do get in contact if you have any comments or suggestions.
- Get directly involved yourself! If you work for an employer who would be willing to support our careers education provision, be that through presenting an assembly or providing a work-based experience.
